TINA JONES – Health History Transcript

Started: Aug 14, 2019 | Patient Exam Time: 191 min

Hello!

Question
08/14/19
11:04 PM
CDT

Hi. I'm Preceptor Diana. I will explain the details of this assignment and your objectives, just as a preceptor would in real life. **Pay close attention to this information as it will help guide your exam.** At the end of this prebrief, you will **answer a short question about the upcoming assignment.** During the simulation, you may **return to these instructions at any time** by scrolling to the top of your transcript.

What is the situation?

Question
08/14/19
11:05 PM
CDT

Your patient is Tina Jones, a 28-year-old African American woman who has just been admitted to Shadow General Hospital for a painful foot wound. Your role in this simulation is that of a healthcare provider who will **take Ms. Jones' health history**, a key component of her admission process.

What are my objectives in this assessment?

Question
08/14/19
11:06 PM
CDT

A health history requires you to **ask questions related to Ms. Jones' past and present health**, from her current foot wound to her pre-existing conditions. You will also want to **review Ms. Jones' systems, psychosocial history, and family medical history**. These assessments together will give you a comprehensive picture of Ms. Jones' overall health. If you discover any disease states, **ask about symptoms and the patient's experiences of them**. Your questioning should cover a broad array of the symptoms' characteristics. Throughout the conversation, you should **educate and empathize with Ms. Jones** when appropriate to increase her health literacy and sense of well-being. Regardless of whether you have assessed Ms. Jones previously, **ask all questions that are necessary for obtaining a complete health history**. While you should **communicate with patients using accessible, everyday language**, it is standard practice to **use professional medical terminology everywhere else, such as in documenting physical findings and nursing notes**. You may complete the exam activities in any order and move between them as needed.

What else will this exam involve?

Question
08/14/19
11:07 PM
CDT

You will **complete nursing tasks to protect the patients safety, privacy, and health**. You can **document your findings, including vital signs**, in the Electronic Health Record. This record provides necessary information for healthcare professionals who will continue patient care. Besides Subjective Data Collection, and Education and Empathy, there are activities within the simulation that provide valuable practice for their real-world counterparts, but they are not automatically graded by the simulation.

How will I be evaluated?

Question
08/14/19
11:08 PM
CDT

In this assignment, **you will be evaluated on your Subjective Data Collection, as well as your Education and Empathy.** Your success in Education and Empathy is based on whether you **promptly respond after identifying a moment worthy of therapeutic communication.** The evaluation of your interview is dependent on how you **word your questions therapeutically and precisely** and **explore all relevant topics with comprehensive breadth and depth.** This assignment takes on average **between 90 and 110 minutes.** This exam may take longer than in real life, because in this safe simulation, students of all experience levels can take time to hone and review their skills. You can **pause and resume the assignment at any time**; your work is always saved automatically.

How does this assignment prepare me for the real world?

Question
08/14/19
11:10 PM
CDT

In this assessment, you will become familiarized with the structure and content of a health history exam so that with real-life patients, you can: ° **ask effective and comprehensive questions** ° **obtain a thorough health history** ° **evaluate the patient's risk of disease, infection, injury, and complications** ° **educate and empathize** ° **and reflect on your experience and identify areas to improve.**

In 1 or 2 sentences, answer this question to help prepare for the upcoming exam: Why is it important to obtain a patient's complete health history?

It allows me to establish a baseline to monitor the patient's progress and get an understanding of the patient's overall health.

Statement

Time to begin.

Hello Ms. Jones. My name is Amina and I will be your nurse today.

Greet

08/14/19

11:14 PM

CDT

Hello.

Can you confirm your name?

Question

08/14/19

11:15 PM

CDT

Tina Jones.

What brings you in today Ms. Jones

Question

08/14/19
11:16 PM
CDT

I got this scrape on my foot awhile ago, and it got really infected. It's killing me.

I'm so sorry to hear that.

Empathize

08/14/19
11:18 PM
CDT

Aw, thanks.

When did you notice the scrape on your foot? (Clarified to When did you first notice the scrape?.)

Question

08/14/19
11:18 PM
CDT

I noticed it immediately . . . because it hurt. [AUDIO COMING SOON] (Clarified to when I noticed the scrape.)

How severe is the pain?

Question

08/14/19
11:21 PM
CDT

It's really bad right now!

Can you please describe the pain?

Question

08/14/19
11:22 PM
CDT

It's throbbing and like, sharp if I try to put weight on it.

When did the pain start?

Question

08/14/19
11:22 PM
CDT

Well, I got the scrape a week ago, but the scrape and the pain got a lot worse in the last few days.

How has the pain changed over time?

Question

08/14/19

11:22 PM

CDT

It hurt all week, but in the last two days it got a lot worse. It got so bad today -- that's why I finally came to the ER.

Does the pain radiate anywhere else?

Question

08/14/19

11:23 PM

CDT

The pain's worse in my foot, but I feel moving up into my ankle, too.

Can you stand or walk on your foot? (Clarified to Is it possible for you to stand on your foot?.)

Question

08/14/19

11:23 PM

CDT

I mean, I literally can't put weight on my foot, the pain is so sharp. (Clarified to if I can stand on my foot.)

Can you rate the pain on a scale of 0 to 10?

Question

08/14/19

11:24 PM

CDT

...Like a 7. It hurts a lot, but whatever pain med the ER gave me is helping a little bit.

Can you tell me where the pain is located?

Question

08/14/19
11:24 PM
CDT

It feels like the pain is just centered around the scrape, like around the ball of my foot. That's where it hurts the most, but my whole foot feels some pain.

How did your injury happen?

Question

08/14/19
11:25 PM
CDT

I was changing a light bulb, and I had to use our little stepstool to reach it. My foot slid off the bottom step and it got all scraped up. I didn't realize how sharp the edge was!

Which foot did you injure?

Question

08/14/19
11:26 PM
CDT

My right foot.

Were you wearing any shoes?

Question

08/14/19
11:30 PM
CDT

No, I was barefoot.

Did you injure anything else?

Question

08/14/19
11:31 PM
CDT

Nope. It's kind of amazing, but I didn't fall hurt my hands, knees, nothing else. Just my foot.

Did you have any alcoholic drinks before your injury?

Question

08/14/19
11:31 PM
CDT

No, I was stone-cold sober. It was the middle of the day.

When did you go to the ER?

Question

08/14/19
11:32 PM
CDT

In the ER they got me started on some pain treatment, gave me some insulin, and something for my fever too. Oh, and they took an X-ray of my foot before cleaning it up and starting me on this antibiotic.

Why did you go to the ER?

Question

08/14/19
11:32 PM
CDT

I got this scrape on my foot a while ago, and I thought it would heal up on its own, but now it's looking pretty nasty. And the pain is killing me!

Did you notice any discharge from the wound?

Question

08/14/19
11:33 PM
CDT

Yeah, there's definitely pus.

When did you notice the pus?

Question

08/14/19
11:34 PM
CDT

I started noticing it two days ago; that and the pain is why I decided to come here.

Can you describe the drainage from your wound?

Question

08/14/19
11:34 PM
CDT

It looks whitish... I don't know, it just looks like pus. It's gross.

Did the wound have an odor?

Question

08/14/19
11:35 PM
CDT

Um, it doesn't smell like anything, as far as I know.

How did you treat your wound at home?

Question

08/14/19
11:35 PM
CDT

I made sure to clean it and keep it bandaged. And I put Neosporin on it.

What did you use to clean your wound and how often?

Question

08/14/19
11:36 PM
CDT

Since it happened, I've been washing it with soap and water, and if it seemed irritated, I would put some peroxide on there and then rinse it off.

How often did you change the bandage?

Question

08/14/19
11:36 PM
CDT

Every morning and night. I was keeping an eye on it.

Did you notice any swelling around the wound?

Question

08/14/19
11:37 PM
CDT

Yeah, it looks swollen around the scrape.

How long have you noticed the swelling?

Question

08/14/19
11:37 PM
CDT

Have you recently felt feverish?

Question

08/14/19

11:46 PM

CDT

Yeah, I started to have one yesterday, and then it was a little better this morning. It kinda crept up all day.

Are you feeling feverish right now?

Question

08/14/19

11:47 PM

CDT

Yeah. I had one in the ER, and I don't know if it's gone all the way back to normal. I feel hot.
