Education & Empathy : 6 of 7 (85.7%)

During the patient interview, there are a number of opportunities to provide patient education and empathy. The opportunities listed below are those identified by nursing experts to be of particular importance to this patient. A **Model Statement** is provided as an example of an appropriate response to each opportunity.

- Opportunities marked as **Not Encountered** are opportunities that were not elicited in the interview
- Opportunities marked as **Not Followed Up** are missed opportunities that were present in the interview, but where no statements were made
- Opportunities marked as **Followed Up** were followed up by students, and include the dialogue between student and patient

1 Symptoms

Followed Up

Description: Mr. Carter reports coming to the ER with high levels of pain, and having frequent pain.

What brings you in today?

Question

09:30 PM PDT

This morning I woke up with awful pain in my hips and knees . . . When I tried to get out of bed it was as if my joints just gave out and I fell right there in my bedroom. I hit my lower back on the bed frame, which I'm sure didn't help matters. To be honest, I'm worried that it's only going to get worse as I sit here getting older every minute.

I'm sorry to hear this.

Empathize

09:32 PM PDT

I appreciate that. Thanks.

whenever you feel weak, try not to get out of bed right away

Educate

09:32 PM PDT

<https://www.coursehero.com/file/41419946/Pain-Education-and-Empathy-Transcriptpdf/>

I understand that.

on a scale of 0 to 10, what is your pain at right now

Question

09:35 PM PDT

Right now, it's more of a 1. Thank God for the medication.

I'm glad it isn't worse than that

Empathize

09:37 PM PDT

Thank you.

what helps with the pain

Question

09:38 PM PDT

The only thing that's helped me has been the pain medication the ER nurse gave me. I usually take Aleve or try to rest if I have any morning stiffness problems related to my arthritis, but that didn't work this morning. The pain was awful.

what medication did they administer to you in the ER (Clarified to: What did the ER prescribe for the pain?)

Question

09:39 PM PDT

They gave me OxyContin when I was in the ER. (Clarified to: what the ER prescribed me)

Good

Empathize

09:39 PM PDT

Thank you for understanding.

what triggers the pain

Question

09:39 PM PDT

I have had a little pain every morning for the past month or so -- just walking around seemed to trigger it. I chalked it up to morning stiffness, getting old, that kind of thing. Sometimes it even feels like weather changes causes it. This morning was a game changer though. I fell in my bedroom and hit my back on the bed frame.

where is the location of the pain

Question

09:40 PM PDT

The pain was mostly in my hips and knees, but my back is sort of tender from when I hit it on the bed frame as I fell.

i'm sorry to hear this

Empathize

09:41 PM PDT

Hey, thanks.

	can you describe how the pain feels	Question 09:41 PM PDT
	It was a deep, aching sort of pain. And occasionally it feels like my joints are grating.	
	i'm sorry to hear this	Empathize 09:41 PM PDT
	Thanks for saying that.	
	how long does the pain last	Question 09:42 PM PDT
	It's gradually been getting worse over the last month. This morning, however, it was unbearable.	
	i'm sorry to hear this	Empathize 09:43 PM PDT
	I appreciate that. Thanks.	
	do you have problems getting out of bed	Question 10:03 PM PDT
	I usually have to use some support to get out of bed with this damn arthritis, but this morning the pain was so unbearable that I collapsed.	
	always ask for help first	Educate 10:03 PM PDT
	Thanks for letting me know.	
	have you had any appetite changes	Question 10:07 PM PDT
	I haven't been particularly hungry with this pain. In general, I eat like I always have.	
	have you had any recent ER visits	Question 10:09 PM PDT
	Not in the past three months.	
	good for you	Educate 10:09 PM PDT
	I'll remember that. Thanks.	

<https://www.coursehero.com/file/41419946/Pain-Education-and-Empathy-Transcriptpdf/>

Model Statement: "I'm sorry to hear you're in pain. I would like to learn more about your pain and how it may have happened, and then we can talk about treating it so you feel better."

2 Worry

Followed Up

Description: Mr. Carter reports feeling worried about his decreasing mobility and gait. He feels upset about his worsening osteoarthritis.

What brings you in today?

Question

09:30 PM PDT

This morning I woke up with awful pain in my hips and knees . . . When I tried to get out of bed it was as if my joints just gave out and I fell right there in my bedroom. I hit my lower back on the bed frame, which I'm sure didn't help matters. To be honest, I'm worried that it's only going to get worse as I sit here getting older every minute.

I'm sorry to hear this.

Empathize

09:32 PM PDT

I appreciate that. Thanks.

whenever you feel weak, try not to get out of bed right away

Educate

09:32 PM PDT

I understand that.

do you have a history of falls

Question

10:06 PM PDT

I've never fallen like I did this morning. It was really very startling.

sorry to hear this

Empathize

10:07 PM PDT

Thank you for understanding.

Model Statement: "I understand that you are worried about your recent fall, and concerned about maintaining your activity level. It's normal to feel concerned."

3 Activity Intolerance Impaired Comfort and ADLs

Not Followed Up

Description: Mr. Carter reports decreased activity and fatigue.

do you have any problems with your balance

Question

09:58 PM PDT

	My arthritis pain makes balance difficult sometimes. Like this morning, when I fell.	
	do you have headaches	Question 09:59 PM PDT
	I don't typically get headaches.	
	do you have any psychological problems	Question 09:59 PM PDT
	No, nothing like that.	
Model Statement: "It sounds like your arthritis symptoms are affecting your daily activities. I'm sorry to hear that."		
4 Fall Risk		Followed Up
	Description: Mr. Carter reports falling at home this morning because of his pain when he tried to get out of bed.	
	What brings you in today?	Question 09:30 PM PDT
	This morning I woke up with awful pain in my hips and knees . . . When I tried to get out of bed it was as if my joints just gave out and I fell right there in my bedroom. I hit my lower back on the bed frame, which I'm sure didn't help matters. To be honest, I'm worried that it's only going to get worse as I sit here getting older every minute.	
	I'm sorry to hear this.	Empathize 09:32 PM PDT
	I appreciate that. Thanks.	
	whenever you feel weak, try not to get out of bed right away	Educate 09:32 PM PDT
	I understand that.	
	what triggers the pain	Question 09:39 PM PDT
	I have had a little pain every morning for the past month or so -- just walking around seemed to trigger it. I chalked it up to morning stiffness, getting old, that kind of thing. Sometimes it even feels like weather changes causes it. This morning was a game changer though. I fell in my bedroom and hit my back on the bed frame.	
	where is the location of the pain	Question 09:40 PM PDT

<https://www.coursehero.com/file/41419946/Pain-Education-and-Empathy-Transcriptpdf/>

	The pain was mostly in my hips and knees, but my back is sort of tender from when I hit it on the bed frame as I fell.	
	i'm sorry to hear this	Empathize 09:41 PM PDT
	Hey, thanks.	
	do you have any other bruises from your falls	Question 10:06 PM PDT
	I hit my back on the bed frame when I fell. I've got some soreness there.	
	do you have a history of falls	Question 10:06 PM PDT
	I've never fallen like I did this morning. It was really very startling.	
	sorry to hear this	Empathize 10:07 PM PDT
	Thank you for understanding.	
Model Statement: "I am concerned that you fell this morning. Unintentional falls are the most common cause of injuries for people older than 65 years. Let's talk about how to keep you safe while you are here, and when you go back home."		
5 Nonmedication Pain Strategies		Followed Up
	what helps with the pain	Question 09:38 PM PDT
	The only thing that's helped me has been the pain medication the ER nurse gave me. I usually take Aleve or try to rest if I have any morning stiffness problems related to my arthritis, but that didn't work this morning. The pain was awful.	
	what medication did they administer to you in the ER (Clarified to: What did the ER prescribe for the pain?)	Question 09:39 PM PDT
	They gave me OxyContin when I was in the ER. (Clarified to: what the ER prescribed me)	
	Good	Empathize 09:39 PM PDT
Thank you for understanding.		

<https://www.coursehero.com/file/41419946/Pain-Education-and-Empathy-Transcriptpdf/>

Model Statement: "Let's talk about strategies to alleviate your pain and improve your ability to handle your daily activities and make sure you are doing everything you can. To ease your symptoms, you can rest for several minutes when your pain is at its worst. Losing a few pounds will place less strain on your joints. Exercise and having strong muscles takes some of the strain off of your joints, which will reduce your pain in the long run. You may use hot or cold packs-- whichever provide you with more comfort."

6 Inappropriate Medications for Older Adults

Followed Up

Description: Mr. Carter has been taking OTC naproxen for his pain. However, this medication meets Beer's criteria of potentially inappropriate medications for older adults.

what helps with the pain

Question
09:38 PM PDT

The only thing that's helped me has been the pain medication the ER nurse gave me. I usually take Aleve or try to rest if I have any morning stiffness problems related to my arthritis, but that didn't work this morning. The pain was awful.

what medication did they administer to you in the ER (Clarified to: What did the ER prescribe for the pain?)

Question
09:39 PM PDT

They gave me OxyContin when I was in the ER. (Clarified to: what the ER prescribed me)

Good

Empathize
09:39 PM PDT

Thank you for understanding.

Model Statement: "I see that you take naproxen for your knee pain. I'd like to discuss finding an alternate medication for you to treat your pain; naproxen is a type of medication called an NSAID, which carries a risk of gastrointestinal bleeding, especially in older adults."

7 Medication Management

Followed Up

Description: Mr. Carter discusses taking several medications at different times of day.

do you take all your medications as prescribed

Question
09:47 PM PDT

Yes, I take them like clockwork.

good for you

Empathize
09:47 PM PDT

Thank you for understanding.

what medication do you take for your atrial fibrillation

Question

09:48 PM PDT

I take warfarin, and verapamil.

what medication do you take for your hypertension

Question

09:49 PM PDT

It's called Hyzaar.

thank you

Empathize

09:49 PM PDT

Thank you.

Model Statement: "I notice that you take several medications at different times of day. It's important to avoid missing doses. Some strategies to help you remember to take all of your pills are to use a pillbox to organize each day, and to set up reminders to take your pills using an alarm."
