Answer: Down
syndrome

• Question 3

Select the neurotransmitter that is most associated with the occurrence of ADHD.

Selected B.
Answer: Dopami
ne

• Question 4

Select the drug of choice to treat psychosis in delirious patients.

Selected D.
Answer: Haloperid
ol

- **Question 5**

Select the characteristic that is greater in childhood than adult onset schizophrenia.

Selected B.
Answer: Social
withdrawal

- **Question 6**

Select the personality disorder in which patients are continually in crisis and exhibit unpredictable behavior.

Selected C.
Answer: Borderlin
e

- **Question 7**

Select the factor that best correlates with attempted and completed suicide.

Selected A.
Answer: Mental
illness

- **Question 8**

Select the brain region that shows the greatest anatomical abnormalities in schizophrenic patients.

Selected D.
Answer: Basal
ganglia

- **Question 9**

Select the gender dysphoria in which genital surgery is usually not chosen.

Selected C.
Answer: Crossdress
er

- **Question 10**

Select the antipsychotic drug for which the labeling carries a black box warning for agranulocytosis.

Selected A.
Answer: Clozapi
ne

- **Question 11**

Select the time of onset for tolerance to develop from continuous use of hallucinogens such as LSD.

Selected C.
Answer: 4-7
 days

- **Question 12**

Select the most reliable method to make a diagnosis of schizophrenia.

Selected D.
Answer: Patient
 history

- **Question 13**

Select the dysfunction that is common to 50% to 85% of schizophrenic patients.

Selected D.
Answer: Eye
 movement

- **Question 14**

Select **two** of the “Four A’s” symptoms of schizophrenia described by Bleuler.

Selected A.
Answers: autism

 B.
 ambivalen
 ce

- **Question 15**

Select the personality disorder in which patients exhibit covert obstructionism, procrastination and pessimism.

Answer: Durkhei
m

- **Question 24**

Select the disorder in which is characterized by lack breast development.

Selected B.
Answer: 5- α -reductase
 deficiency

- **Question 25**

Select the age range of the highest rate of substance dependence or abuse.

Selected B.
Answer: 18-
 25

- **Question 26**

Select **two** terms preferred to describe sexual orientation.

Selected A.
Answers: Gay
 D.
 Lesbia
 n

- **Question 27**

Select the **two** patient populations in which delirium occurs most frequently.

Selected B.
Answers: Terminally ill
 C.
 Long-term
 care

- **Question 28**

Select the drug used to treat neuroleptic malignant syndrome.

Selected C.
Answer: Dantrole
 ne

- **Question 29**

Select the drug that is most likely to cause parkinsonian movement symptoms.

Selected D.
Answer: Haloperid
 ol

- **Question 30**

Select the **two** main conditions to initially identify in adult psychiatric emergencies.

Selected Answers: B.
Suicide
D.
Substance
intoxication

- **Question 31**

Select the psychiatric emergency that is indicated by mothers who express inadequate distress over their children's medical symptoms.

Selected Answer: D.
Munchausen's syndrome

- **Question 32**

Select the drug that is least life-threatening when consumed in an overdose.

Selected Answer: B.
Zolpide m

- **Question 33**

Select the drug that is most safe and effective in treating mild to moderate memory loss in early Alzheimer's disease.

Selected Answer: A.
Donepezil

- **Question 34**

Select the substance that is most commonly abused by adolescents.

Selected Answer: B.
Marijuana

- **Question 35**

Select the development time of symptoms in neuroleptic malignant syndrome.

Selected Answer: D.
10-14 days

- **Question 36**

Select the patient population at most risk of mortality from delirium.

Selected C.

Answer: Alcohol
withdrawal

• **Question 37**

Select the most distinguishing characteristic of delirium.

Selected B.
Answer: Sudden
onset

• **Question 38**

Select the category of symptoms that is most commonly comorbid with cognitive disorders.

Selected A.
Answer: Behavior
al

• **Question 39**

Select the primary defense mechanism that is common in delusional disorder.

Selected A.
Answer: Projectio
n

• **Question 40**

Select the neurotransmitter system that is most associated with the addictive rewarding properties of opioids.

Selected A.
Answer: Dopaminer
gic

• **Question 41**

Select the type of hallucinations most common in schizophrenia.

Selected C.
Answer: Auditor
y

• **Question 42**

Select the diagnostic criterion for catatonia resulting from a medical condition.

Selected C.
Answer: Waxy
flexibility

• **Question 43**

Select the **two** factors that are not applicable to diagnosing schizoaffective disorder.

Selected C.
Answers: Medical
 condition
 D.
 Substance
 abuse

- **Question 44**

Select the percentage of substance-addicted persons with a concurrent psychiatric disorder.

Selected B.
Answer: 50

- **Question 45**

Select the hepatic enzyme that performs the initial metabolism of alcohol.

Selected A.
Answer: AD
 H

- **Question 46**

Select the epidemiologic characteristic of tardive dyskinesia symptoms.

Selected C.
Answer: Absence in age less
 than 50

- **Question 47**

Select the neurotransmitter that inhibits sexual orgasm.

Selected A.
Answer: Serotoni
 n

- **Question 48**

Select the drug that is least likely to cause male sexual dysfunction.

Selected C.
Answer: sertralin
 e

- **Question 49**

Select the youngest age at which childhood-onset schizophrenia can be distinguished from autism spectrum.

Selected A.
Answer: 3

- **Question 50**

Select the most effective form of questioning when taking a sex history.

Selected B.
Answer: Open-
ended

- **Question 51**

Select the initial intervention to treat children experiencing acute school refusal.

Selected B.
Answer: Return to school the next
normal day

- **Question 52**

Select the primary method to assess cognition.

Selected C.
Answer: Mental status
exam

- **Question 53**

Select the preferred drug used to treat alcohol withdrawal.

Selected C.
Answer: Lorazepa
m

- **Question 54**

Select the procedure most applicable to confirming a diagnosis of delirium.

Selected C.
Answer: EE
G

- **Question 55**

Select the brain region that is associated with substance addiction.

Selected A.
Answer: Prefrontal
cortex

- **Question 56**

Select the two defense mechanisms used commonly by patients with personality disorders.

Selected Answers: C.
Splitting
D.
Projection

- **Question 57**

Select the lifetime prevalence of schizophrenia in the United States.

Selected Answer: A.
0.1-
1.0%

- **Question 58**

Select the subtype of schizophrenia in which auditory hallucinations are frequent.

Selected Answer: D.
Residual

- **Question 59**

Select the neurotransmitter deficiency that is most associated with delirium.

Selected Answer: B.
Acetylcholine

- **Question 60**

Select the rating scale used to assess medication-induced movement disorders.

Selected Answer: C.
AIM
S

- **Question 61**

Select the symptom not present in paranoid personality disorder.

Selected Answer: B.
Fixed
delusions

- **Question 62**

Select the percentage range of schizophrenic patients that remain significantly impaired throughout their lives.

Selected C.

Answer: 40 to
60

- **Question 63**

Select the drug most likely to inhibit female orgasm.

Selected Paroxetin
Answer: e

- **Question 64**

Select the two non-drug therapies most likely to be effective in treating paraphilic disorders.

Selected A.
Answers: Cognitive-behavioral
C.
Insight

- **Question 65**

Select the two patient populations most likely suffer neuroleptic-induced parkinsonian symptoms.

Selected A.
Answers: Femal
e
C.
Elderl
y

- **Question 66**

Select the factor that is most influential in determining gender role development.

Selected B.
Answer: Geneti
cs

- **Question 67**

Select the most common paraphilic disorder.

Selected C.
Answer: Pedophili
a

- **Question 68**

Select the therapy that is contrary to position statements of the American Academy of Child and Adolescent Psychiatry.

Selected B.

Answer: Convers
on

- **Question 69**

Select the psychiatric disorder in which patients refuse mental health care and deny their problems.

Selected C.
Answer: Personaliti
ty

- **Question 70**

Select the most common cause of dementia in elderly persons.

Selected C.
Answer: Alzheimer's
disease

- **Question 71**

Select the substance of abuse with the strongest evidence for genetic association.

Selected C.
Answer: Alcoh
ol

- **Question 72**

Select the characteristic found in persons with intersex conditions.

Selected D.
Answer: Chromosome X
abnormality

- **Question 73**

Select the medical condition in which erectile dysfunction drugs (e.g., sildenafil) are likely to be ineffective.

Selected D.
Answer: Ischemic heart
disease

- **Question 74**

Select the neurotransmitter that increases sexual desire.

Selected B.
Answer: Dopami
ne

- **Question 75**

Select the infectious disease that when untreated may lead to an incorrect diagnosis of depression.

Selected B.
Answer: Lym
e

- **Question 76**

Select the two essential features of sexual dysfunction.

Selected A.
Answers: Failure to achieve
 orgasm

 C.
 Pain during sexual
 activity

- **Question 77**

Select the personality disorder in which patients seek social withdrawal.

Selected D.
Answer: Schizotyp
al

- **Question 78**

Select the percentage of the U.S. population with a substance dependence problem as of year 2012.

Selected B.
Answer: 20
%
%

- **Question 79**

Select the youngest age by which early-onset schizophrenia occurs.

Selected B.
Answer: 13

- **Question 80**

Select two psychiatric disorders that are often misdiagnosed as childhood-onset or early-onset schizophrenia.

Selected A.
Answers: Autism
 spectrum

 C.
 Bipolar II

- **Question 81**

Select the comorbid disorder that is more frequent in children with gender dysphoria.

Selected A.
Answer: Down
 syndrome

- **Question 82**

Select **two** treatments for adults who identify as transgender.

Selected A.
Answers: Hormon
 al

 D.
 Surgical

- **Question 83**

Select **two** comorbid factors common in schizophrenic patients.

Selected A.
Answers: Substance abuse

 D.
 Undiagnosed medical
 illness

- **Question 84**

Select the age at which sexual identity is self-evident.

Selected B.
Answer: 2 to 3
 years

- **Question 85**

Select the pair of terms that represents the greatest conflict regarding sexual behavior.

Selected C.
Answer: medical and
 legal

- **Question 86**

Select the **two** characteristics that describe normal sexual behavior.

Selected A.
Answers: Varies from era to
 era

 B.
 Reflects cultural
 mores

- **Question 87**

Select the medical condition that occurs less frequently in schizophrenic patients than in

the general population.

Selected D.
Answer: Rheumatoid
 arthritis

- **Question 88**

Select the most frequently abused illicit drug.

Selected A.
Answer: Marijuan
 a

- **Question 89**

Select the two drugs used to treat alcohol dependence.

Selected A.
Answers: Naltrexo
 ne

 C.
 Lorazepa
 m

- **Question 90**

Select the percentage of remission that results from correct antipsychotic drug therapy of schizophrenic patients.

Selected C.
Answer: 4
 5

- **Question 91**

Select the percent blood alcohol level at which voluntary motor activity becomes impaired.

Selected C.
Answer: 0.
 2

- **Question 92**

Select the drug most likely to be effective treating paraphilic disorders.

Selected D.
Answer: Medroxyprogester
 one

- **Question 93**

Select the most distinguishing feature in the course and prognosis of schizophrenia.

Selected A.
Answer: Worsening after each
 relapse

- **Question 94**

Select the personality disorder in which patients are preoccupied with perfectionism and interpersonal control.

Selected B.
Answer: Obsessive-
 compulsive

- **Question 95**

Select the rare adverse effect of SSRI antidepressants.

Selected A.
Answer: Tardive
 dyskinesia

- **Question 96**

Select the neurotransmitter for which the metabolite 5-HIAA in CSF is evident and predictive of suicide.

Selected A.
Answer: Serotoni
 n

- **Question 97**

Select the two behaviors of schizophrenic patients that occur more frequently than in the general population.

Selected B.
Answers: Violence
 e
C.
 Suicide

- **Question 98**

Select the neurotransmitter that has least involvement in drug-induced movement disorders.

Selected C.
Answer: Dopami
 ne

- **Question 99**

Select the factor that exerts the strongest influence on the initiation of substance use disorder in adolescents.

Selected C.
Answer: Parent
 S

- **Question 100**

Select the intrinsic chemical released in orgasm that reinforces pleasurable sensation.

Selected D.
Answer: Oxytoci
 n

- **Question 101**

When completing this exam, did you comply with Walden University's Code of Conduct including the expectations for academic integrity?

Selected Ye
Answer: S
